

## Using the surveys

The Caregiver and Friend isolation check surveys were created primarily as another tool for churches to use to take the pulse of your ministry and to keep in touch with members.

These forms would be printed and dropped off with a self-addressed envelope so that they could easily be mailed back to the church. The forms may also be emailed out to members as a PDF with instructions on how to send them back to staff and volunteers. The forms could also be dropped off in person where applicable.

There is an area on the bottom of the form for you to add a contact phone number should someone have issues filling out the form or sending it back.
